To: Whom it may concern:

Lepi Enterprises, Inc. has been working with the Genesis HealthCare System for over 20-25 years. They have worked with the Good Samaritan Hospital and the Bethesda Hospital which is now Genesis and our Hospice Building.

Lepi Enterprises, Inc. has developed and demonstrated a "Partnership" not a client / vendor relationship. When the Lepi Enterprises, Inc. works with Genesis Hospital, they take the patient's needs, staff needs, and visitor needs into consideration while designing and developing the project and carries this task to the end. They truly understand what it takes to develop a first rate hospital or medical facility. They understand the Ohio Building Code, the Local Authority Having Jurisdiction, Life Safety Code 2000, and the New Life Safety Code 2012. If you use the Lepi Enterprises, Inc., I guarantee you will have a partner that will assist you in making your project a success.

I personally have worked with Brian King, and Jeff Miller and highly recommend them for any project you may have. They are a contractor you can trust and know they will be by your side in the beginning to the end, and after the project has ended. They have earned my trust and have kept it without disappointment; they truly are a partner of mine and the Genesis HealthCare System.

Sincerely,

A handwritten signature in black ink, appearing to read "Ron Chaffin", written over a white background.

Ron Chaffin
Director, Plant Operations
